Ref.: Mechanic validations

Dear mr. Colindres:

With respect to mechanic licencing, please be advised as follows.

When our Department validates a foreign mechanic licence, it is not only the licence but the whole system behind it that is being validated. This means that if the system requires a type rating to be in that basic licence, then the type rating has to be in that basic licence.

With respect to the above you are hereby advised that after today no licences that require a type rating will be validated if the applicable type rating is not included in the basic licence.

You are kindly requested to notify your staff and clients about this (especially the Russian and Ukraine operators).

If you have questions concerning the above please do not hesitate to contact our Department.

Sincerely,

Ing. Ch. B. Ramírez
Manager Maintenance & Airworthiness
Department of Civil Aviation of Aruba
